

Slip, trip, flip and ejection

Rachel Andrews

RYA Chief Instructor, Motor Cruising and Power

RIB Milly (2013)

Training Impact

- Signposting
- Improved guidance
- Hooking
- Communication
- Seating + handholds
- Kill cord message

TIME TO THINK... SAFETY

Wearing a kill cord can prevent serious injury or death. Display these stickers on your boat, console or outboard to remind the helm to always wear a kill cord.

Small, open powerboats should be fitted with a kill cord, which if used correctly, will stop the engine if the driver becomes dislodged from the helm position.

Clip on, cast off...
